

**remote sensing geology wikipedia** - remote sensing in geology is remote sensing used in the geological sciences as a data acquisition method complementary to field observation because it allows mapping of geological characteristics of regions without physical contact with the areas being explored, **remote sensing and geophysics mining geology exploration** - remote sensing and geophysics understand geological processes and overcome exploration challenges through focused structural interpretation of remote sensing data at srk our interpretation of remote sensing and geophysical data is built on our core strengths, **remote sensing special issue remote sensing in geology** - the state of the art tools of remote sensing include lidar and digital elevation models very high resolution optical remote sensing thermal remote sensing hyperspectral remote sensing microwave and sar and remote sensing with historical aerial photographs or archival images which span from a century ago to present, **remote sensing links geologynet** - remote sensing data for the uk canada centre for remote sensing remote sensing data for canada rsgs china remote sensing data csrsr china taipei remote sensing data esrin digital geological mapping digital geological mapping technologies by the usgs 2000 symposium on digital mapping techniques, **remote sensing sections remote sensing in geology** - section remote sensing in geology geomorphology and hydrology section ocean remote sensing section forest remote sensing section remote sensing in agriculture and vegetation section remote sensing image processing section land surface fluxes section urban remote sensing, **remote sensing and spectral geology** - preface spectral geology and remote sensing richard bedell alvaro p cr sta and eric grunsky xv chapter 1 two papers on the use of hyperspectral airborne satellite imagery in mineral exploration remote sensing and spectral geology r a and e economic geology, **geological remote sensing group grsg** - the geological remote sensing group grsg is a special interest group of the geological society of london geolsoc and the remote sensing and photogrammetry society rpsoc the grsg is an association of enthusiasts keen on the geological aspects of remote sensing, **itc courses applied remote sensing for earth sciences** - geological remote sensing 7 credits this course gives an introduction to geological regolith and soil remote sensing in the application of earth resources mapping it includes the integration of remote sensing imagery with geoscience data sets regional geophysics e g aeromagnetism radiometrics and dems for geological interpretation and the generation of geological maps
